

Power Bank Travel 6700

XB200

The Power Bank Travel is part of the innovative, stylish Xtorm Power Bank range, the XB2 line. The Power Banks in this line combine unique features with a well thought-out design which has already won two prestigious design awards: the Red Dot Design Award 2017 and the iF DESIGN AWARD 2017.

The Power Bank Travel enables you to charge your mobile devices anywhere and anytime. This Power Bank has a 6700mAh internal battery, providing enough power to charge a smartphone at least three times. It is also possible to charge two devices at once. What's more, its rubber finish gives this back-up battery a streamlined, stylish look.

The Power Bank Travel has an extendable micro USB cable for charging mobile devices (with micro USB port) as well as the Power Bank itself. This means you'll always have a cable to hand if you need one. Of course, you can charge mobile devices that have other kinds of USB connector, such as Apple Lightning, by using a different cable.

The Power Bank Travel features Quick Charge 3.0 technology, allowing extra fast charging of mobile devices. If your smartphone uses the same technology, it will charge up to 60% faster! The battery of your mobile device will charge in next to no time. The LED lights around the on/off button show you at a glance how much power the Power Bank has used.

The Power Bank Travel 6700 is the ideal charging solution for everyday use or while travelling. Charges mobile devices, such as your smartphone, tablet, GoPro or camera, wherever and whenever you want to!

reddot award 2017 winner

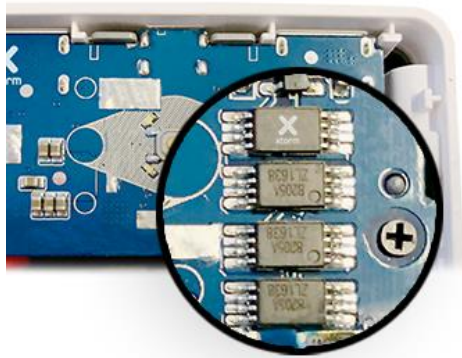

In short:

- **Universal Power Bank with 6700mAh internal battery**
- **Removable micro USB cable**
- **Extra fast charging with Quick Charge 3.0**
- **Allows you to charge 2 mobile devices at once**

Features of the Xtorm Power Bank Travel 6700

High efficiency

This Xtorm Power Bank Travel 6700 is highly efficient and ensures the least possible loss of energy during the charging process.

Auto Power Management

This Xtorm Power Bank is provided with the APM-chip. This means that the Power Bank automatically balances the correct charging speed and efficiently divides the power between the attached devices.

Fast Charging

The Power Bank Travel 6700 has a high input and high outputs. These features make it possible to charge the connected device as fast as possible and recharge the Power Bank itself on high speed.

QuickCharge 3.0

This XB2 Power Bank includes the latest innovation QuickCharge 3.0. A Technique designed to make the charging process even up to 60% faster on a QC 3.0 enabled device.

Xtorm safety check

A-class batteries

Xtorm uses only the best battery cells that meet all safety requirements and can provide the fast charging you need.

Overload protection

Xtorm mobile chargers protect the Xtorm's internal battery and the battery of the attached mobile device from overcharging.

Temperature control

All Xtorm chargers are provided with a temperature control chip that prevents overheating.

Auto Power Management

The Xtorm APM-chip automatically balances the power over the attached devices to prevent overcharging or overheating.
