

POWERplus[®]

**FLICKERING EFFECT
SOLAR CANDLE**

NIGHTMOTH

POWERplus® Nightmoth

Flickering effect SOLAR CANDLE

The Nightmoth is a safe solar powered candle with a flickering effect just like a real candle. Charge in daytime by day- or sunlight and at night the candle starts automatically through the built-in daylight sensor.

Ideal for use with children or with elderly people: no open fire and you can see no difference compared with a normal candle.

Solar candle in milky glass style plastic holder

Flickering effect like a real candle

Integrated daylight sensor for automatic switch on. Manual on/off switch integrated in base

Safe candle: looks like a real candle but without fire
