

SMART USB CHARGER

WITH ON-OFF SWITCH

6 USB PORTS - 6.8A max.

ECOSAVERS

EcoSavers® Smart USB Charger

The EcoSavers Smart USB Charger is a 6-port USB charger with a maximum output of 6.8A

The Smart USB Charger is specially designed for charging your digital devices safely and conveniently. This product is compatible with every brand and every product that is rechargeable by USB.

The Smart USB Charger can accept a wide range of AC input voltages, so this makes the charger a perfect travel companion.

The Smart USB Charger is equipped with a smart IC which automatically detects the optimal charging conditions for the connected USB device and allows a quick and safe charging process.

The 6 ports allows charging 2 tablets and 2 smartphones or 6 smartphones at the same time.

The Smart USB Charger guarantees a safe charging and features:

- Short circuit protection
- Over voltage protection
- Overload protection
